

Mohem Token (MOH) Overview

About Mohem Token (MOH)

Mohem Token (MOH) is a BEP-20 token on the BNB Smart Chain, launched in July 2021. It is designed to enable fast, low-fee micro-payments, provide accessible blockchain education, and create a rewarding Play-to-Earn (P2E) ecosystem. Our mission is to empower local businesses, newcomers, and developers with practical crypto tools, transparent governance, and engaging incentives.

Our Three Pillars

- **Low-Fee Micro-Payments:** Mohem Token facilitates seamless, cost-effective transactions for local businesses using a lightweight merchant API and QR-based invoicing system, leveraging BNB Smart Chain's efficiency for rapid settlement.
- **Practical Blockchain Education:** We offer a structured learning portal in English and Persian (Farsi) with step-by-step courses and NFT-based completion certificates to make blockchain accessible to newcomers.
- **Play-to-Earn Ecosystem:** Our P2E platform provides web and mobile games with MOH rewards, fostering user engagement and incentivizing developers through bounties and grants.

Security and Transparency

Mohem Token prioritizes trust and accountability. Our smart contract includes role-based controls, optional pause functionality, and multi-signature treasury management. Liquidity pools on PancakeSwap and ApeSwap are locked for a minimum of 12 months, with details available in the transparency document. Team allocations have a 12-month cliff and 18-month linear release, while marketing allocations follow a 6-month cliff and 12-month linear release. A two-phase audit plan includes an initial audit by a tier-2 firm (e.g., Hashex, Dessert, or TechRate) followed by a comprehensive audit by CertiK or SlowMist, with reports publicly accessible.

Token Utility and Governance

MOH serves multiple purposes:

- **Micro-Payments:** Simplifying merchant transactions with low-cost, efficient settlements.
- **Education Access:** Unlocking course discounts and exclusive NFT credentials.

- ****PYE Rewards:**** Earning tokens through games and tournaments with anti-cheat mechanisms.
- ****Governance:**** Enabling community-driven decisions on burns, grants, and protocol parameters via a decentralized autonomous organization (DAO).

Roadmap and Vision

Our 2025-2026 roadmap includes launching a QR payment MVP, an education portal with initial lessons, a PYE web beta, and DAO voting functionality by 2025. By 2026, we aim to expand with local payment service provider partnerships and cross-chain capabilities, driving adoption and scalability.

Commitment to Community

Mohem Token is built with community at its core. We engage through Telegram, X, LinkedIn, Instagram, and Facebook, providing verifiable links to contract details, liquidity locks, audit reports, treasury wallets, and monthly progress reports on our transparency page.
